

E-VENUS - Ref. D16151 / 2143L75E08

SACEX

LED

R65

R10

The constant evolution of the market towards **products with a low environmental impact**, combined with users' growing awareness of the environment and the impact of production processes on CO2 emissions, has led Vignal CEA's R&D team to design innovative solutions.

The result is **E Venus**, the first beacon in a range of products designed by Vignal CEA to respect the ecosystem, known as E-System.

TECHNICAL CHARACTERISTICS

Brand	SACEX
Product Type	Complete lamp
Voltage	10 - 30V
Source	LED
Consumption	7W
Color	Amber / Orange
Connector	ISO 4148/4165
Fixation	Pole mounting (DIN 14620)
Lens Material	Recycled polycarbonate
Diameter	128 mm
Height	172 mm
Weight	0,45 Kg
Flash Patterns	Double Flash
Operation Temperatures	-30°C to +50°C
EMC	ECE R10
ECE	ECE R65, R65 class 1

Industry

Agriculture, Construction, Forestry, Handling and Forklifts, Priority vehicle, Trailers and Semi-trailers, Trucks, Vans and Chassis cab

OTHER VISUALS

E-VENUS Ecological LED beacon

80% recycled materials
The plastics used are made exclusively from recycled materials, with a large proportion recycled on site at Vignal CEA (France).

Recyclable beacon
Our beacons are part of a circular economy. Plastic, metal and WEEE materials are recycled.

Reduced PCB - less waste
The electronic circuit has been redesigned to reduce its size and minimize waste.

-20% lower power consumption
Energy consumption has been optimized from 9W to 7W.

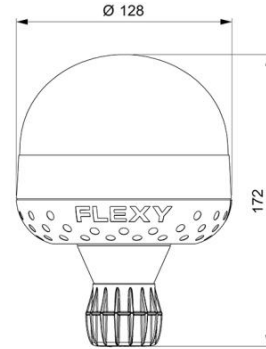

Photovoltaic solar energy
Equipping our Swiss factory with photovoltaic panels ensures green energy at every stage of production.

Recycled packaging
Our products are carefully packed in 100% recycled cardboard boxes.

SWISS MADE

The E-VENUS range designed by VIGNAL CEA reflects the group's commitment to the environment.
